SPECIALISTS IN THE SUPPLY AND CNC MACHINING OF ALUMINIUM EXTRUSIONS

We can machine up to 8,000mm (3 Axis) and 6,700mm (4 Axis) in one operation without the need to index the material. We have 5 CNC milling machines in total plus a CNC double mitre saw for cutting sections up to 8,000mm in length. We work both as a subcontractor on free issue material for many of the extrusion mills, or source material directly on behalf of our customer providing a one stop shop for finished aluminium extruded components.

CIMAN MIRA - 6.7 MT CNC 4 AXIS VERTICAL MILLER
